Experiences

Work as a PHP Developer in Web3 startup from 2021 – 2022

In that startup, my work was to maintain their website and deliver dynamic data using PHP and MySQL database.

Freelancing from 2021 – current

In this freelancing journey, I created so many projects such as eCommerce websites for clothing brands, handicraft brands, and many more, festival websites, portfolio websites, companies websites, etc.

Portfolio

My Portfolio Website

I created my portfolio website for introducing myself, displaying my works, and sharing my knowledge in form of blog articles.

[Check out my website](#)

Crypto tracker (CryptoLurker)

It's a simple and easy crypto tracker created in React using RapidAPI's Coinraking and Bing News Search API and this app also using Redux tool kit, Redux persist, and many more.
